

International Research Council on the Biomechanics of Injury

2007 INTERNATIONAL IRCOBI CONFERENCE

ON

THE BIOMECHANICS OF INJURY

September 19-21, 2007 – MAASTRICHT (The Netherlands)

PROCEEDINGS

**Papers of this book have been collected by Kai-Uwe Schmitt
in charge of the IRCOBI Secretariat.**

**Copies are available at the IRCOBI Secretariat c/o AGU Zurich
Winkelriedstrasse 27 – 8006 Zurich (Switzerland)**

Tel: +44 41 251 54 30 - Fax: +44 41 251 54 31 - E-mail: secretariat@ircobi.org

IRCOBI Conference – Maastricht (The Netherlands) - September 2007

TABLE OF CONTENTS

Bertil Aldman Memorial Lecture Child protection in cars – advances & key challenges <i>Farid Bendjellal</i> <i>Britax Childcare Group (France)</i>	3
SESSION I – JOINT IRCOBI/APSN SESSION ON INTEGRATED SAFETY	
Intelligent safety systems integrating active and passive safety <i>R. de Lange*, J. Tandler**</i> <i>TNO Science & Industry* (The Netherlands), Siemens VDO Automotive AG** (Germany)</i>	17
A study on occupant kinematics behaviour and muscle activities during pre-impact braking based on volunteer tests <i>S. Ejima*, K. Ono*, S. Holcombe*, K. Kaneoka**, M. Fukushima***</i> <i>Japan Automobile Research Institute*, Department of Orthopedic Surgery, University of TSUKUBA **, TSUKUBA Medical Center Hospital*** (Japan)</i>	31
Control oriented modeling of vehicular occupants and restraint systems <i>E. van der Laan, F. Veldpaus, M. Steinbuch</i> <i>Technische Universiteit Eindhoven (The Netherlands)</i>	47
Field performance study of electronic stability control system effectiveness in US fatal crashes <i>J. Padmanaban</i> <i>JP Research Inc. (USA)</i>	59
SESSION II – CHARACTERIZING PEDESTRIAN IMPACTS	
Characteristics on fractures of tibia and fibula in car impacts to pedestrians – influence of car bumper height and shape <i>D. Otte*, C. Haasper**</i> <i>Accident Research Unit*, Trauma Department**, Medical University Hanover (Germany)</i>	71
The importance of rotational kinematics in pedestrian head to windshield impacts <i>J. Mordaka*, S. Kleiven**, M. van Schijndel-de Nooij*, R. de Lange*, L. Guerra Casanova***, E. Carter****, H. von Holst**.</i> <i>TNO Automotive* (The Netherlands), KTH, Royal Institute of Technology Stockholm** (Sweden), Unidad de Biomecánica, Instituto Universitario de Investigación del Automóvil (INSIA)*** (Spain), University of Birmingham*** (UK)</i>	83
Effect of active muscle forces on knee injury risk for pedestrian standing posture at low speed impacts <i>A. Chawla, S. Mukherjee, A. Soni, R. Malhotra</i> <i>Indian Institute of Technology (India)</i>	95

SESSION III – LOWER EXTREMITY INJURIES IN FRONTAL CRASHES

- Lower extremity risk and harm associated with narrow offset frontal impact crashes** 115
D. Logan, M. Fitzharris, B. Fildes
Monash University Accident Research Centre, Melbourne (Australia)
- Effects of muscle tense on impact responses of lower extremity** 127
T. Sugiyama, H. Kimpara, M. Iwamoto, D. Yamada, Y. Nakahira, M. Hada
TOYOTA Central R&D Labs. (Japan)

SESSION IV – HEAD AND BRAIN INJURY MECHANISMS

- Identifying the mechanical behaviour of brain tissue in both shear and compression** 143
M. Hrapko, H. Gervaise, J. van Dommelen, G. Peters, J. Wismans
Material Technology Institute, Eindhoven University of Technology (The Netherlands)
- Influence of angular acceleration duration on functional outcomes following mild diffuse brain injury** 161
R. Fijalkowski, B. Stemper, F. Pintar, N. Yoganandan, T. Gennarelli
Department of Neurosurgery, Medical College of Wisconsin (USA)
- Role of rotational acceleration and deceleration pulses on brain strains in lateral impact** 173
J. Li, J. Zhang, N. Yoganandan, F. Pintar, T. Gennarelli
Department of Neurosurgery, Medical College of Wisconsin (USA)
- Influence of rotational acceleration on intracranial mechanical parameters under accidental circumstances** 185
C. Deck, D. Baumgartner, R. Willinger
Strasbourg University (France)

SESSION V – BIOMECHANICS OF NECK INJURIES

- Head/neck/torso behavior and cervical vertebral motion of human volunteers during low speed rear impact: mini-sled tests with mass production car seat** 201
J. Pramudita, K. Ono***, S. Ejima**, K. Kaneoka***, I. Shiina***, S. Ujihashi**
Tokyo Institute of Technology, Japan Automobile Research Institute**, University of Tsukuba*** (Japan)*
- Characteristics of anti-whiplash seat designs with good rear-life performance** 219
O. Bostrom, A. Kullgren***
Autoliv Research, Folksam and Karolinska Institutet** (Sweden)*
- An evaluation of various neck injury criteria in vigorous activities** 233
J. Funk, J. Cormier, C. Bain, H. Guzman, E. Bonugli
Biodynamic Research Corporation, San Antonio, Texas (USA)
- Toward a lower neck rear impact injury criterion – correlation of lower neck loads with spinal kinematics** 249
B. Stemper, N. Yoganandan, T. Gennarelli, F. Pintar
Department of Neurosurgery, Medical College of Wisconsin (USA)

SESSION VI – PROTECTING CHILDREN AND ELDERLY

- Estimating Q3 dummy injury criteria for frontal impacts using the child project results and scaling reference values** 263
A. Palisson, F. Cassan*, X. Troiseille*, P. Lesire*, F. Alonzo***
LAB PSA Peugeot Citroën Renault, INRETS** (France)*
- Three years old child neck FE modelling under automotive accident conditions** 277
F. Meyer, N. Bourdet, S. Roth, R. Willinger
Strasbourg University (France)
- Low severity frontal crashes that cause injury to elderly occupants** 291
K. Digges, R. Welsh**, A. Morris***
The George Washington University (USA)*
*Vehicle Safety Research Centre Loughborough University** (UK)*

SESSION VII – BIOMECHANICS OF THORACIC INJURIES

- Means of crash pulse variation and the injury reducing potentials in moderate and high severity frontal impacts** 301
B. Pipkorn, H. Mellander**, T. Andersson*, J. Olsson**
Autoliv Research, TSRE AB** (Sweden)*
- Chest injuries and injury mechanisms in oblique lateral impacts** 311
N. Yoganandan, F. Pintar*, T. Gennarelli*, P. Martin**, S. Ridella***
Department of Neurosurgery, Medical College of Wisconsin, US Department of Transportation NHTSA** (USA)*
- Quasi-static and dynamic thoracic loading tests: cadaveric torsos** 325
G. Shaw, D. Lessley*, J. Evans*, J. Crandall*, J. Shin*, P. Portier** G. Paoloni****
University of Virginia Center For Applied Biomechanics (USA), CEESAR**, Vicon*** (UK)*
- Investigation of the traumatic rupture of the aorta (TRA) by simulating real-world accidents** 349
C. Shah, W. Hardy*, K. Yang*, C. Van Ee**, R. Morgan***, K. Digges****
Bioengineering Center, Wayne State University, Detroit, MI (USA), Design Research Engineering, Novi, MI** (USA), The George Washington University, Ashburn, VA*** (USA)*

SESSION VIII – EXPERIMENTAL BIOMECHANICS, MODELLING AND RISK ASSESSMENT: SHORT PRESENTATIONS

- Pedestrian accident simulations methodology using detailed vehicle models and age-dependent leg fracture limits on the pedestrian** 363
L. Martínez, L. Guerra, G. Ferichola, A. García,
Polytechnic University of Madrid, University Institute for Automobile Research (Spain)
- Validation of a human FE lower limb model for a child pedestrian against accident data** 367
O. Ito, M. Okamoto*, Y. Takahashi*, F. Mori**, M. Meissner***, C. Untaroiu***, J. Crandall****
Honda R&D Co., Ltd. Automobile R&D Center (Japan), PSG Co., Ltd.**; University of Virginia Center for Applied Biomechanics** (USA)*

Experimental characterization and damage model of the human skin response to dynamic loadings	371
<i>C. Jacquemond***, M. Coret**, K. Bruyere-Garnier*, M. Brunet** Laboratoire de Biomécanique et Mécanique des Chocs*, Laboratoire de Mécanique des Contacts et des Structures** (France)</i>	
Strain rate dependent mechanical properties of bovine bone in axial compression	377
<i>A. van der Westhuizen*, T. Cloete*, S. Kok**, G. Nurick* Blast Impact and Survivability Research Unit, University of Cape Town*, Department of Mechanical and Aeronautical Engineering, University of Pretoria** (South Africa)</i>	
Modelling biomechanics of volunteers subject to loading by a motorized shoulder belt tensioner	381
<i>C. Good*, D. Viano**, J. McPhee***, J. Ronsky**** University of Calgary/Collision Analysis Calgary Ltd. * (Canada), Wayne State University/ProBiomechanics LLC** (USA), University of Waterloo***, University of Calgary**** (Canada)</i>	
Numerical simulation of shoulder lateral impacts for shoulder injury prediction	385
<i>S. Duprey, K. Bruyere, J-P. Verriest Laboratory of Biomechanics and Mechanics of Impact (France)</i>	
Abdominal sensors for child dummies of the Q family, injury criteria and injury risk curves	389
<i>H. Johannsen*, F. Alonzo**, V. Schindler* Technische Universität Berlin* (Germany), INRETS - LBMC Lyon** (France)</i>	
Possible head impacts for standing passengers in public transportation – influence of an obstacle on the passenger kinematics	393
<i>T. Robert, P. Beillas, A. Maupas, J-P. Verriest LBMC, French National Institute for Transport and Safety Research, INRETS (France)</i>	
Dynamics models for the assessment of spinal injury from repeated impact in high speed planing boats	397
<i>C. Bass*, R. Salzar*, J. Ash*, A. Ziemba*, S. Lucas*, R. Peterson**, E. Pierce***, B. Price*** Center for Applied Biomechanics, University of Virginia, Charlottesville, Virginia* (USA), L-3 Communications**, Naval Surface Warfare Center, Panama City, Florida*** (USA)</i>	
"Crash violence" within the traffic system – fatal injury risks and their reduction in road traffic on two-lane main roads	401
<i>S. Olkkonen*, M. Kelkka**, E. Rätty**, M. Juurinen**, T. Kari**, K. Laakso**, T. Ernvall** Finnish Institute of Occupational Health* and Helsinki University of Technology** (Finland)</i>	
Implementation of head injury criteria in cyclist-car accidents	405
<i>P. Verschueren*, H. Delye**, B. Haex*, D. Berckmans***, I. Verpoest****, J. Goffin**, J. Vander Sloten*, G. Van der Perre* Division of Biomechanics and Engineering Design*, Division of Experimental Neurosurgery & Neuroanatomy**, Division M3-BioRes***, Division of Mechanical Metallurgy****, K.U. Leuven (Belgium)</i>	
Effect of vehicle design in bicycle frontal crashes	409
<i>M. Singh, R. Dey, S. Mukherjee, D. Mohan, A. Chawla Transportation Research and Injury Prevention Programme, Indian Institute of Technology (India)</i>
