2007 INTERNATIONAL IRCOBI CONFERENCE
ON
THE BIOMECHANICS OF INJURY

September 19-21, 2007 – MAASTRICHT (The Netherlands)

PROCEEDINGS

Papers of this book have been collected by Kai-Uwe Schmitt
in charge of the IRCOBI Secretariat.
Copies are available at the IRCOBI Secretariat c/o AGU Zurich
Winkelriedstrasse 27 – 8006 Zurich (Switzerland)
Tel: +44 41 251 54 30 - Fax: +44 41 251 54 31 - E-mail: secretariat@ircobi.org
TABLE OF CONTENTS

**Bertil Aldman Memorial Lecture**
Child protection in cars – advances & key challenges 3
Farid Bendjellal
Britax Childcare Group (France)

**SESSION I – JOINT IRCOBI/APSN SESSION ON INTEGRATED SAFETY**

Intelligent safety systems integrating active and passive safety 17
R. de Lange*, J. Tandler**
TNO Science & Industry* (The Netherlands), Siemens VDO Automotive AG** (Germany)

A study on occupant kinematics behaviour and muscle activities during pre-impact braking based on volunteer tests 31
Japan Automobile Research Institute*, Department of Orthopedic Surgery, University of TSUKUBA **, TSUKUBA Medical Center Hospital*** (Japan)

Control oriented modeling of vehicular occupants and restraint systems 47
E. van der Laan, F. Veldpaus, M. Steinbuch
Technische Universiteit Eindhoven (The Netherlands)

Field performance study of electronic stability control system effectiveness in US fatal crashes 59
J. Padmanaban
JP Research Inc. (USA)

**SESSION II – CHARACTERIZING PEDESTRIAN IMPACTS**

Characteristics on fractures of tibia and fibula in car impacts to pedestrians – influence of car bumper height and shape 71
D. Otte*; C. Haasper**
Accident Research Unit*, Trauma Department**, Medical University Hanover (Germany)

The importance of rotational kinematics in pedestrian head to windshield impacts 83
TNO Automotive* (The Netherlands), KTH, Royal Institute of Technology Stockholm** (Sweden), Unidad de Biomecánica, Instituto Universitario de Investigación del Automóvil (INSIA)*** (Spain), University of Birmingham*** (UK)

Effect of active muscle forces on knee injury risk for pedestrian standing posture at low speed impacts 95
A. Chawla, S. Mukherjee, A. Soni, R. Malhotra
Indian Institute of Technology (India)
SESSION III – LOWER EXTREMITY INJURIES IN FRONTAL CRASHES

Lower extremity risk and harm associated with narrow offset frontal impact crashes
D. Logan, M. Fitzharris, B. Fildes
Monash University Accident Research Centre, Melbourne (Australia)

Effects of muscle tense on impact responses of lower extremity
T. Sugiyama, H. Kimpara, M. Iwamoto, D. Yamada, Y. Nakahira, M. Hada
TOYOTA Central R&D Labs. (Japan)

SESSION IV – HEAD AND BRAIN INJURY MECHANISMS

Identifying the mechanical behaviour of brain tissue in both shear and compression
M. Hrapko, H. Gervaise, J. van Dommelen, G. Peters, J. Wismans
Material Technology Institute, Eindhoven University of Technology (The Netherlands)

Influence of angular acceleration duration on functional outcomes following mild diffuse brain injury
R. Fijalkowski, B. Stemper, F. Pintar, N. Yoganandan, T. Gennarelli
Department of Neurosurgery, Medical College of Wisconsin (USA)

Role of rotational acceleration and deceleration pulses on brain strains in lateral impact
J. Li, J. Zhang, N. Yoganandan, F. Pintar, T. Gennarelli
Department of Neurosurgery, Medical College of Wisconsin (USA)

Influence of rotational acceleration on intracranial mechanical parameters under accidental circumstances
C. Deck, D. Baumgartner, R. Willinger
Strasbourg University (France)

SESSION V – BIOMECHANICS OF NECK INJURIES

Head/neck/torso behavior and cervical vertebral motion of human volunteers during low speed rear impact: mini-sled tests with mass production car seat
Tokyo Institute of Technology*, Japan Automobile Research Institute**, University of Tsukuba*** (Japan)

Characteristics of anti-whiplash seat designs with good rear-life performance
O. Bostrom*, A. Kullgren**
Autoliv Research*, Folksam and Karolinska Institutet** (Sweden)

An evaluation of various neck injury criteria in vigorous activities
J. Funk, J. Cormier, C. Bain, H. Guzman, E. Bonugli
Biodynamic Research Corporation, San Antonio, Texas (USA)

Toward a lower neck rear impact injury criterion – correlation of lower neck loads with spinal kinematics
B. Stemper, N. Yoganandan, T. Gennarelli, F. Pintar
Department of Neurosurgery, Medical College of Wisconsin (USA)
SESSION VI – PROTECTING CHILDREN AND ELDERLY

Estimating Q3 dummy injury criteria for frontal impacts using the child project results and scaling reference values
A. Palisson*, F. Cassan*, X. Troiseille*, P. Lesire*, F. Alonzo**
LAB PSA Peugeot Citroën Renault*, INRETS** (France)

Three years old child neck FE modelling under automotive accident conditions
F. Meyer, N. Bourdet, S. Roth, R. Willinger
Strasbourg University (France)

Low severity frontal crashes that cause injury to elderly occupants
K. Digges*, R. Welsh**, A. Morris**
The George Washington University* (USA)
Vehicle Safety Research Centre Loughborough University** (UK)

SESSION VII – BIOMECHANICS OF THORACIC INJURIES

Means of crash pulse variation and the injury reducing potentials in moderate and high severity frontal impacts
B. Pipkorn*, H. Mellander**, T. Andersson *, J. Olsson*
Autoliv Research*, TSRE AB** (Sweden)

Chest injuries and injury mechanisms in oblique lateral impacts
Department of Neurosurgery, Medical College of Wisconsin*, US Department of Transportation NHTSA** (USA)

Quasi-static and dynamic thoracic loading tests: cadaveric torsos
University of Virginia Center For Applied Biomechanics* (USA), CEESAR**, Vicon*** (UK)

Investigation of the traumatic rupture of the aorta (TRA) by simulating real-world accidents
Bioengineering Center, Wayne State University, Detroit, MI* (USA), Design Research Engineering, Novi, MI** (USA), The George Washington University, Ashburn, VA*** (USA)

SESSION VIII – EXPERIMENTAL BIOMECHANICS, MODELLING AND RISK ASSESSMENT: SHORT PRESENTATIONS

Pedestrian accident simulations methodology using detailed vehicle models and age-dependent leg fracture limits on the pedestrian
L. Martinez, L. Guerra, G. Ferichola, A. García.
Polytechnic University of Madrid, University Institute for Automobile Research (Spain)

Validation of a human FE lower limb model for a child pedestrian against accident data
Honda R&D Co., Ltd. Automobile R&D Center* (Japan), PSG Co., Ltd.**; University of Virginia Center for Applied Biomechanics** (USA)
Experimental characterization and damage model of the human skin response to
dynamic loadings 371
Laboratoire de Biomécanique et Mécanique des Chocs*, Laboratoire de Mécanique des
Contacts et des Structures** (France)

Strain rate dependent mechanical properties of bovine bone in axial compression 377
A. van der Westhuizen*, T. Cloete*, S. Kok**, G. Nurick*
Blast Impact and Survivability Research Unit, University of Cape Town*, Department of
Mechanical and Aeronautical Engineering, University of Pretoria** (South Africa)

Modelling biomechanics of volunteers subject to loading by a motorized shoulder
belt tensioner 381
C. Good*, D. Viano**, J. McPhee***, J. Ronsky****
University of Calgary/Collision Analysis Calgary Ltd. * (Canada), Wayne State University/
ProBiomechanics LLC** (USA), University of Waterloo***, University of Calgary**** (Canada)

Numerical simulation of shoulder lateral impacts for shoulder injury prediction 385
S. Duprey, K. Bruyere, J-P. Verriest
Laboratory of Biomechanics and Mechanics of Impact (France)

Abdominal sensors for child dummies of the Q family, injury criteria and injury risk
curves 389
H. Johannsen*, F. Alonzo**, V. Schindler*
Technische Universität Berlin* (Germany), INRETS - LBMC Lyon** (France)

Possible head impacts for standing passengers in public transportation – influence
of an obstacle on the passenger kinematics 393
T. Robert, P. Beillas, A. Maupas, J-P. Verriest
LBMC, French National Institute for Transport and Safety Research, INRETS (France)

Dynamics models for the assessment of spinal injury from repeated impact in high
speed planing boats 397
Center for Applied Biomechanics, University of Virginia, Charlottesville, Virginia* (USA), L-3
Communications**, Naval Surface Warfare Center, Panama City, Florida*** (USA)

"Crash violence" within the traffic system – fatal injury risks and their reduction in
road traffic on two-lane main roads 401
Finnish Institute of Occupational Health* and Helsinki University of Technology** (Finland)

Implementation of head injury criteria in cyclist-car accidents 405
P. Verschueren*, H. Delye**, B. Haex*, D. Berckmans***, I. Verpoest****, J. Goffin**
J. Vander Sloten*, G. Van der Perre*
Division of Biomechanics and Engineering Design*, Division of Experimental Neurosurgery &
Neuroanatomy**, Division M3-BioRes***, Division of Mechanical Metallurgy****, K.U. Leuven
(Belgium)

Effect of vehicle design in bicycle frontal crashes 409
M. Singh, R. Dey, S. Mukherjee, D. Mohan, A. Chawla
Transportation Research and Injury Prevention Programme, Indian Institute of Technology
(India)
