

IRCOBI Copyright Agreement

IRCOBI thanks the “Author(s)” for participating in the International Research Council on Biomechanics of Injury Conference (“Conference”). In consideration of having reviewed, edited, and accepted the specified manuscript for publication, IRCOBI requires that authors accept this agreement before publication. One author may accept this agreement on behalf of all of the authors of a paper. In this case, the author accepts responsibility for licensing the paper on behalf of any and all co-authors.

By ticking the corresponding box in the online submission dialogue the authors agree to the following section A. For government employees section B applies.

SECTION A. Accepting the copyright agreement will evidence the mutual understanding between IRCOBI and the author(s) that Author(s) owns all copyrights to the Manuscript, and that Author(s) grants IRCOBI a non-exclusive license to publish the Manuscript in the Proceedings of the Conference, in paper, electronic media, and/or online formats. This non-exclusive, royalty-free, license is not transferable without written permission from the Author(s). The Author(s) warrants that he/she/they is/are the author(s) and sole owner(s) of the work submitted, that it is original and that the Author(s) has (have) the full power to grant such rights.

SECTION B (for government employees). The Manuscript that has been submitted to IRCOBI fits the description of a “Government Work” that cannot be copyrighted. The Manuscript was written as part of my (our) official duties as a government officer(s) or employee(s). The Manuscript is freely available to IRCOBI for publication without a copyright notice, and there are no restrictions on its use, now or subsequently. I (we) retain no rights to the Paper.

IRCOBI Code of Publishing Ethics

Submission for publication at IRCOBI implies compliance with these principles:

- All authors must have made a substantial contribution to the study under submission.
- All submissions should be an accurate account of the work performed and data presented should be correct, and due diligence has been applied to reduce the risk of errors.
- The work should not be plagiarised, and references to previous work should be appropriately acknowledged.
- The work should not be concurrently in submission for publication elsewhere.
- Authors should maintain a record of raw data for a reasonable period of time.
- The substantial scientific aspect of the work has not been previously published.
- Any required ethical permission has been obtained from the relevant institution/company/individual submitting.
- Any conflicts of interests are declared.
